3.2 Diploma Thesis, Doctoral Thesis, Habilitation Script

Diploma Thesis (1994) – *Eine Fallstudie zur Spezifikation von Systemanforderungen in der Spezifikationssprache OBSCURE*, 194 pages, Saarland University. <http://christoph-benzmueller.de/papers/T1.pdf>

Advisors: Jacques Loeckx (Saarland University) and Klaus Gersonde (Fraunhofer-Institut Biomedizinische Technik, IBMT, St. Ingbert).

Synopsis: Executable formal specification of a knowledge-based information, visualization and maintenance system in bioinformatics; the diploma project was conducted at the Fraunhofer-Institut für Biomedizinische Technik in St. Ingbert.

Doctoral Thesis (1999) – *Equality and Extensionality in Higher-Order Theorem Proving*, 178 pages, Saarland University. <http://christoph-benzmueller.de/papers/T2.pdf>

Synopsis: Study of equality and extensionality in higher-order logic with novel contributions to the proof theory, model theory and automation of classical higher-order logic. The thesis provided the theoretical foundation of the LEO theorem provers and initiated the development of an international infrastructure for higher-order automated theorem proving; I have, following Peter Andrews and his group at CMU, significantly contributed to the pioneering of this area; see (35, 28) for a discussion of the historical developments.

Habilitation (2006) – *Cumulative Habilitation Script (on Integrated Mathematics Assistance Systems and the Automation of Higher-Order Logic)*, 357 pages, Saarland University. <http://christoph-benzmueller.de/papers/T3.pdf>

Synopsis: Argument for the development of integrated assistance systems for formal proof developments in mathematics; own contributions with a focus on the integration of AI technologies (planning, agent-based paradigms, natural-language tutoring, learning and abstraction techniques, mathematical ontologies, knowledge graphs). The foreword of the habilitation script, published as a separate journal article *Towards Computer Aided Mathematics* (63), sketches some main challenges of the area.
